

# BCJ, FORENSIC INVESTIGATIONS EMPHASIS

The Forensic Investigations major is designed to provide students a balanced interdisciplinary education, emphasizing the practical issues and theoretical concepts employed by forensic investigators. Students will receive specialized training in crime scene investigations, including courses offered at the Kansas Bureau of Investigation's Crime Laboratory. This major will prepare students for careers in local, state and federal law enforcement as well as enhance the skills of professionals already in the field.

## Additional Student Learning Outcomes

In addition to the core criminal justice program student learning outcomes, students who graduate with a forensic investigation major are expected to be able to:

- Demonstrate the ability to use forensic investigation techniques to collect, document, and process evidence.
- Effectively testify as an expert witness in a criminal trial.
- Apply forensic pathology principles to death investigations.

## Degree Requirements

In addition to the requirements stated below, students must complete 34-35 hours of General Education (<https://catalog.washburn.edu/undergraduate/programs-degrees-graduation-requirements/general-education-requirements/>) and any additional hours needed to reach the minimum 120 credit hours required for graduation. Some of the courses below may also fulfill general education or other degree requirements.

In addition, all Criminal Justice majors must complete a complementary minor, certificate, or additional major; students must declare this with the department that grants this. Please see your advisor for more information.
