

HOME HEALTH AIDE (HHA)

The Home Health Aide course is designed for students who want to enter the medical field and provide direct care services to clients in their homes. Home Health Aides assist other healthcare professionals in maintaining and restoring the client to optimum levels of physical and emotional well-being while allowing the client to remain at home. This program will offer students preparation to test for the industry-recognized credentials listed below.

Students must be 17 years of age by the start of the program and possess a current CNA certification to enroll.

Program Information

- Program Start (semesters): August; January; Summer
- Financial Aid available (for post-secondary students only): No
- Veteran Benefits Eligible (for post-secondary students only): No
- Industry-recognized credentials: HHA
