

STERILE PROCESSING - CERT A

The Sterile Processing program introduces the primary responsibilities of a central sterile technician and includes practical applications of learned concepts and procedures. Topics include preparation, storage, distribution of instruments, supplies and equipment, quality assurance and inventory management. Upon completion, students should be able to apply the principles of sterilization/disinfection in the workplace, as well as the principles of distribution of instruments/supplies. This program will offer students preparation to test for the industry-recognized credentials listed below.

Note: Students must be at least 17 years old by Oct. 1 of the fall semester start.

Program Information

- Program Start (semesters): August
- Financial Aid available (for post-secondary students only): Yes
- Veteran Benefits Eligible (for post-secondary students only): Yes
- Industry-recognized credentials: CPR; Certified Registered Central Services Technician (CRCST)
